## High Voltage Shunt Regulators

## Capability Statement

[www.oil4lessllc.com](http://www.oil4lessllc.com)

Oil 4 Less® LLC is a Veteran-Owned Small Business with ten years experience in providing quality shunt regulator replacements to the Victoreen Corotron™. Our low noise Codatron® semiconductor high voltage shunt regulator is capable of operation to 204 degrees Centigrade / 400 degrees Fahrenheit, translating to longer lifetime, higher reliability, and lower cost of use. The low noise allows decreased bench set-up time and more reliable data for analysis; both benefits translating to greater profitability. It is designed to be easily programmable to any of the popular voltages used in photo-multiplier applications such as radiation detectors and downhole neutron detectors; users have found our Codatron® to be quieter than the Victoreen Corotron™.
